Float **Polypropylene**

Wire **21 AWG**

Max voltage **48V (AC or DC)**

Max current **0.5A**

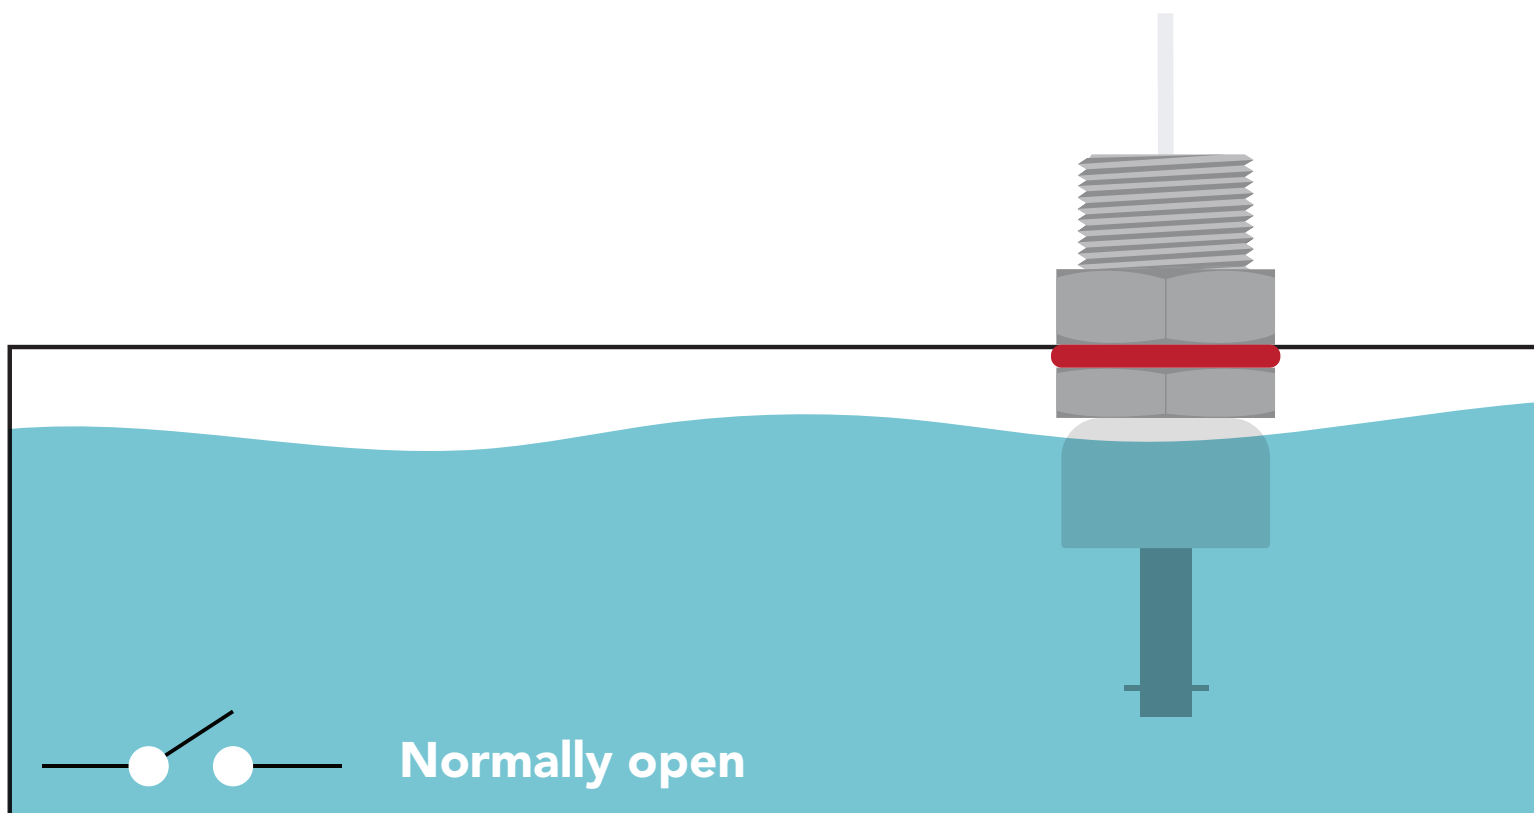

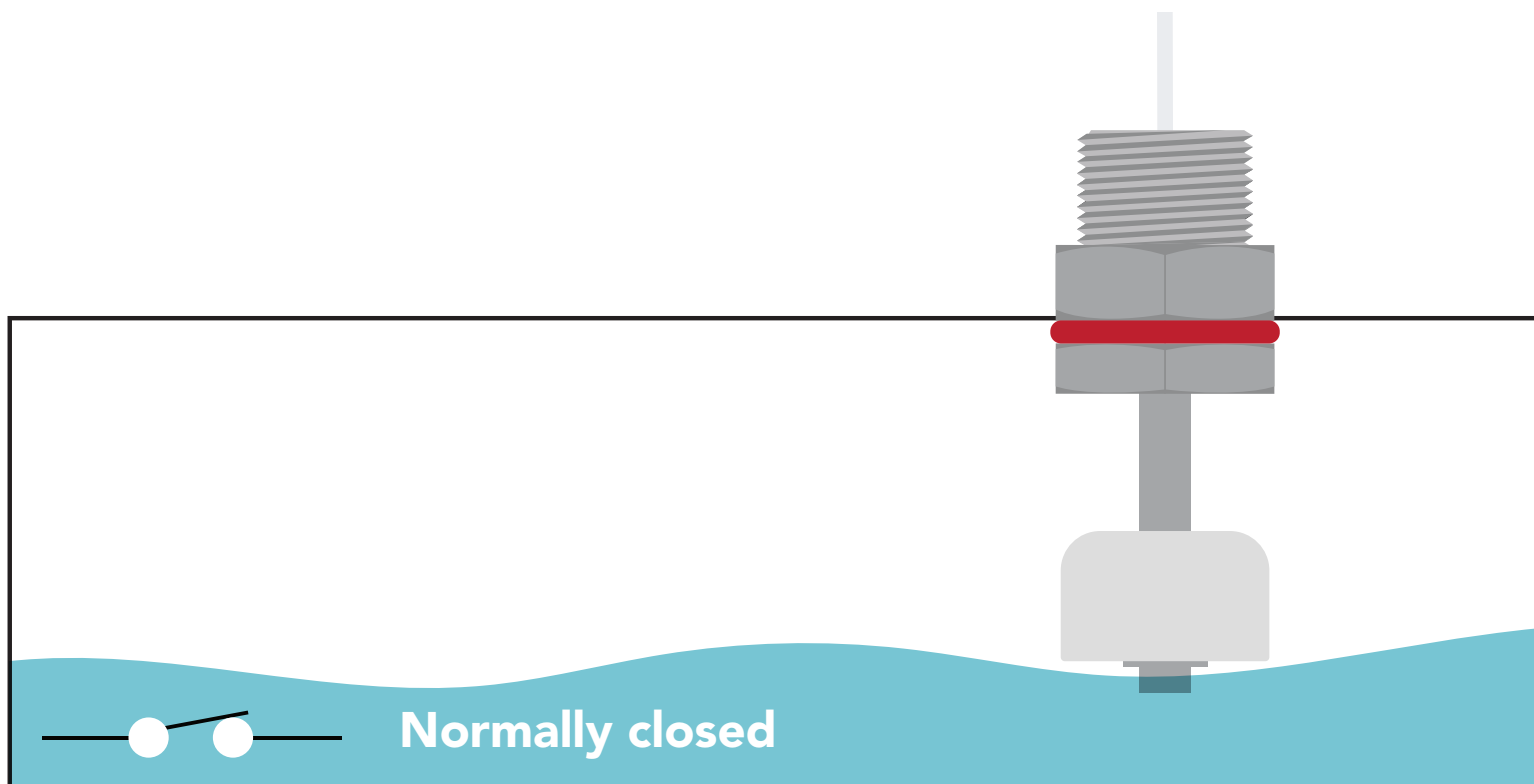

Float Switch dimensions

Tank full sensor

Tank empty sensor

Installation guide

Cut out the hole template shown below, and use a drill to drill out the 11mm hole needed to fit the float switch.

Once the 11mm hole has been made, unscrew and remove the blukhead. Install the float switch from the inside of your tank or container.

Now that the float switch is in place, re-attach and fully tighten the blukhead.
