

ASSISTANT FRIENDLY PRESENCE CARING COMPANION ENTERTAINER

Buddy[®]
The Emotional Robot

Entirely **designed in France**, Buddy is an “**emotional companion**” robot.

This adorable personal robot can improve everyone's life and is particularly well suited to assisting seniors in loss of autonomy, whether at home or in specialized structures such as nursing homes and care facilities.

Buddy addresses the most important needs of vulnerable seniors. Beyond the **reassuring** and **comforting presence** that it offers throughout the day, Buddy improves **security** (doubt removal), preserves **social link** (communication with familial or professional environment, content sharing), and supports needs for **cognitive stimulation** (memory games, quiz). Finally, Buddy acts as an assistant providing useful information (menu, activities), reminding important dates and entertaining, by playing radio/music.

AT HOME

«For senior's assistance, to enable them "Aging in place", I think that we have with Buddy, the **essential, unique** and **indispensable companion**, that can, in my opinion, both generate significant savings to the Health Insurance, but above all allow our seniors maintaining their independence and autonomy, staying connected, being able to communicate, break the loneliness and age in security and serenity. »

Jean LOAEC
Strategy and Innovation Director

IN RETIREMENT HOME AND SERVICES RESIDENCE

«To date, we are not aware of an equivalent product to Buddy, which is at his level of maturity in terms of mechatronics and finishing. His cute, small, friendly side makes him an **easy acceptance companion** ...»

Fabrice FLOTTES de POUZOLS
Digital Director

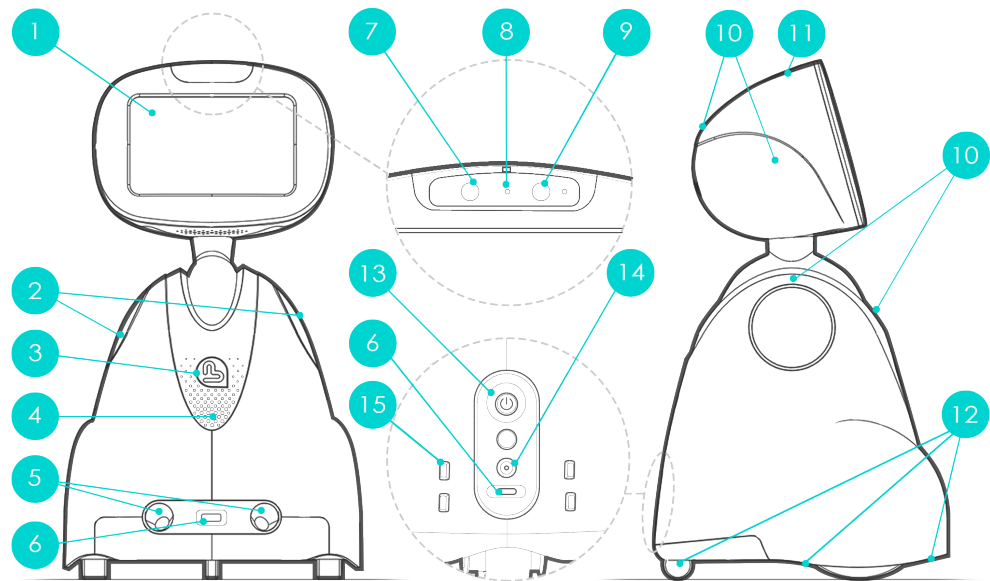

BENEFITS

- Helps keeping seniors with diminishing autonomy at home
- Improves their quality of life by taking care of their health and well-being
- Reduces feeling of isolation and loneliness
- Facilitates communication with loved ones
- Relieves the work of caregivers
- Provides peace of mind for the family
- Increases work opportunities between professionals and residents
