1. BOARD LAYOUT & FUNCTION

| Function | Description | | |
|--------------------------------|---|--|--|
| GPIO Status LEDs | LED indicator for digital IO. Turn on when the IO state is high. | | |
| GPIOs Breakout | Micro:bit GPIOs breakout. Arranged in color-coded GVS format. With 3.3V power output for each GPIO. These pins are broken out: | | |
| | P0, P1, P2, Button A, Button B, P9, P12, P13, P14, P15, P16. | | |
| Maker Ports | JST-SH 4-Ways Connector for external modules. Compatible with Qwiic, STEMMA QT and Grove (Via Conversion Cable). | | |
| | These pins are available on Maker Ports: P0-P9, P1-P2, P2-P12 | | |
| micro:bit Socket | Plug in micro:bit here. Make sure the LEDs on micro:bit are facing out. | | |
| 5V Supply | 5V output for external sensors/modules. | | |
| 18650 Li-Ion Battery Holder | Insert the 18650 Li-Ion battery here. | | |
| Maker Port (I2C) | JST-SH 4-Ways Connector for external modules. Compatible with Qwiic, STEMMA QT and Grove (Via Conversion Cable). | | |
| | This port is for I2C modules only. | | |
| I2C Breakout | Breakout of micro:bit I2C pins. | | |
| Motor Test Buttons | Press to test the functionality of the motor driver. Motor will run at full speed. | | |

| | - | | | |
|--------------------|---|--|--|--|
| Servos Port | Connectors for 8x RC servo motors. V+ voltage is equal to power source voltage. | | | |
| Motor Terminals | Connect to the motor terminal. Motor voltage at full speed is equal to power source voltage. Motor direction is dependent on the polarity. | | | |
| RGB LEDs | User programmable WS2812B RGB LEDs. Connected to P8. | | | |
| Ext. RGB LED | For external WS2812B RGB LEDs. Daisy-chained to onboard RGB LED. (Connected to Dout pin of RGB LED 1). | | | |
| On/Off Switch | Turn On/Off the power. | | | |
| Ext. On/Off Switch | Header for external On/Off switch. The onboard switch must be in Off position to use the external switch. | | | |
| Micro USB | Micro USB port for charging the battery or power up the Motion:Bit. No data transmission on this port. | | | |
| Power/Charge LED | LED indicator for: Power - Turn on whenever the board is powered up. Charge - Turn on when charging is in progress. Turn off when full. | | | |
| Power Input | Terminal for external 3.6V - 6V power input. Can be used for external LiPo or 4x AA batteries. | | | |
| Motor Status LEDs | Turn on when the motor is running. | | | |

2. SPECIFICATIONS

| No | Parameters | | Min | Max | Unit |
|----|---|-----------------------|-----|-----|------|
| 1 | Power Input Voltage | | 3.6 | 6 | V |
| 2 | Analog Input Voltage | | | 3.3 | V |
| 3 | Total +3V3 Output Current (GPIO Breakout & Grove Ports) | | - | 200 | mA |
| 4 | Total +5V Output Current | | - | 300 | mA |
| 5 | | Continuous | - | 1 | А |
| | Maximum DC Motor Current | Peak (< 5 seconds) | - | 1.5 | А |
