

# Firgelli Linear Actuator Accessories – DPDT Switch Kit

Use this kit to connect your –S type linear actuator to a voltage source and be able to control the direction manually. Simply push the switch one direction to extend and the other direction to retract. The included fuse will protect the circuit from shorts and overloading. Not included in this kit, is the required power supply (6 or 12volts DC). You may also require more wire so you can position the switch the required distance from the actuator.

## Options:

- Latching – Switch position remains constant when released
- Non-latching – Switch returns to off position when released

## Contents:

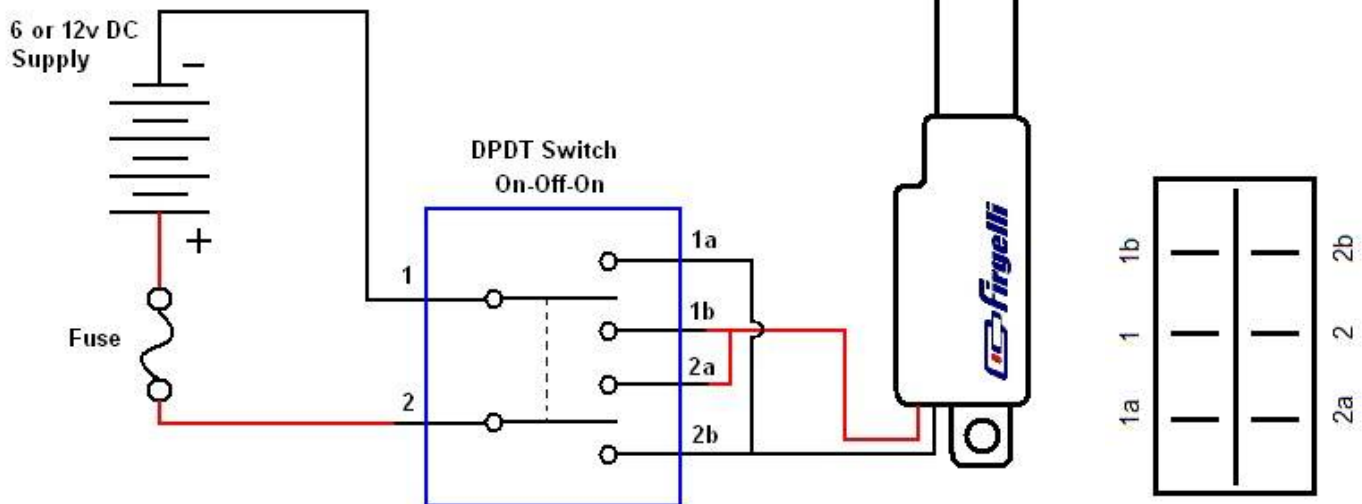

- 1 DPDT switch
- 6 crimp connectors
- 1 fuse
- 40cm of 2 conductor wire
- 4 pieces of heat-shrink

## For Use With:

- PQ12 –S actuators
- L12 –S actuators
- L16 –S actuators

## Suggested Wiring Schematic:

## Notes:

- For more details on each component see our documentation: [Accessories.pdf](#)
