

## **Humanola Teleoperation – Quick Start Guide**

### **Step 1: Install Humanola Teleoperation Software**

Install Humanola's teleoperation software on your Unitree G1 robot following the provided installation package and integration instructions.

### **Step 2: Prepare Your VR Headset**

Put on your VR headset and ensure it is connected to the internet. Any supported commercial VR headset may be used.

### **Step 3: Open the Teleoperation Portal**

Using the VR headset's browser, navigate to:

**<https://teleop.humanola.com>**

### **Step 4: Start Teleoperating**

Log in to the Humanola teleoperation interface and begin controlling your Unitree G1 robot in real time.

### **Experience Low-Latency Control**

Humanola enables immersive, low-latency remote robot control from anywhere in the world.

**Feel your robot.**
