# Control panel icons

## Power

- ✓ Press and release the Power button  to turn the robot ON or OFF. The robot will begin a clean cycle when power is turned on.
- ✓ Press and hold, while at the home position, to enter night light setting mode.

## Cycle

### Cycle

- ✓ Press and release the Cycle button to start a clean cycle.
- ✓ If already cycling, press Cycle to pause; press again to resume a cycle.
- ✓ Press and hold, while at the home position, to enter sleep mode.

## Empty

### Empty

- ✓ Press and release the Empty button to start an empty cycle (empties all litter into the waste drawer).
- ✓ If already cycling, press Empty to pause; press again to cancel a cycle.
- ✓ Press and hold, while at the home position, to enter wait time setting mode.

## Reset

### Reset

- ✓ Press and release the Reset button to reset the cat sensor. (Do this after emptying the waste drawer, adding litter, etc.)
- ✓ If already cycling, press Reset to pause; press again to cancel a cycle.
- ✓ Press and hold, while at the home position, to enter control panel lockout.

# 1

## Ensure proper placement

- ✓ If possible, place the Litter-Robot in the same location as the old litter box (at least during transition).
- ✓ Make sure the unit is indoors on a firm, level surface and in a cool, dry location.
- ✓ Place litter mats or rugs in front of the unit.

# 2

## Add litter

- ✓ Use clumping litter or litter beads and crystals that are small enough to pass through the screen.
- ✓ Add litter until it meets the raised fill line when spread flat (8-10 lbs or 1 gal). Be careful not to overfill.

# 3

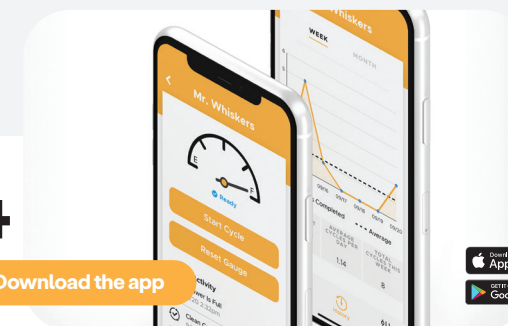

## Power on

- ✓ Insert the small plug end of the power cord into the socket on the back of the base.
- ✓ Plug the AC/DC adapter into a wall outlet.
- ✓ Press the Power button on the control panel.

# 4

## Download the app

- ✓ **Litter-Robot Connect units only – look for the WiFi symbol on the control panel.** Download the Whisker app and follow the onboarding instructions.
