IR Remote Controller (2-Key)

Ever wanted a simple way of activating your robot from across the room? This remote controller is designed to be as simple, small, and affordable so that for the majority of the projects you've built, you will no longer need to move constantly to switch it on/off. This infrared remote control offers two buttons - the simplest and most straightforward "ON" and "OFF" interaction. With a little programming you can also alter these two keys for commands like "move forward/backward" or "missile unlock/missile launch" combinations, you name it.

Note: The remote control comes with a CR2025 coin cell battery.

Applications

- MiniQ Discovery Kit
- MiniQ 2WD
- MiniQ 4WD

Specifications

- Encoded Format: NEC, Address is 0x00FF
- Assign Buttons: ON(0x02) and OFF(0x98)
- Battery Type: CR2025 coin cell
- Frequency: 38Khz
- Transmitting Range: >8m
- Transmitting Angle: 60°
- Facial materials: 0.125mm PET
- Current: 3-5uA(Quiescent)/3-5mA(Dynamic)
- Dimensions: 86 x 40 x 6mm
