

3V vertical water pump

Introduction

3V Vertical water pump is a kind of DC micro submersible pump. Equipped with male and female Dupont line connectors, it can apply to the fountain used in many situations with much convenience.

Characteristics

- With low noise and good performance.
- Made by engineering plastics to protect it from exploring.
- Small and easy to install.

Parameter

Item	Parameter
Name	3V vertical water pump
Version	V1.0
SKU	EF11098
Operating Voltage	DC 3~4.5V
Operating Method	Submersible Type
Operating Life	200 hours plus
Head of Delivery	0.3~0.8 meters
Water Inlet Diameter	5 mm
Water Outlet Diameter	4.5 mm
Net Weight	28 g

Quick Start

Operating Method

Put the water outlet into the water pipe , connect the power of the pump and the ground wire with 3V DC power, then put the pump into the water and it starts to work by drawing water or drawing off water after switching on.
