

Installing the LAC Configuration Software in Windows 8.1

First, press **win + I** to launch the charm bar, and click **Change PC Settings** at the bottom.

Then, go to **Update and Recovery**, go to **Advanced startup**, select **Change advanced startup options**, and scroll to the bottom of the page, click **Restart Now** button . Remember to save all your work first before clicking it.

PC settings P	Recent
PC and devices Accounts	Add devices Add or remove devices PC and devices > Devices
OneDrive	Recycle Bin Ot
Search and apps Privacy	PC and devices > Disk space
Network	Advanced startup
Time and language	Update and recovery > Recovery
Ease of Access	
Update and recovery	View personalization settings

The computer will reboot to a startup menu, and then click **Troubleshoot**.

.

Click Advanced Options at next screen.

Choose Startup Settings next,

€ Adva	anced options	5	
	System Restore Use a restore point recorded on your PC to restore Windows	C:\	Command Prompt Use the Command Prompt for advanced troubleshooting
	System Image Recovery Recover Windows using a specific system image file	₽	Startup Settings Change Windows startup behavior
<0>	Automatic Repair Fix problems that keep Windows from loading		

And click the **Restart** button.

The computer reboots and prompts another menu to choose from. One of the items is to "**Disable driver signature enforcement**". Press number **7** or **F7** to continue booting to Windows 8 with digital sign enforcement disabled.

Startup Settings	
Press a number to choose from the options below:	
Use number keys or functions keys F1-F9.	
 1) Enable debugging 2) Enable boot logging 3) Enable low-resolution video 4) Enable Safe Mode 5) Enable Safe Mode with Networking 6) Enable Safe Mode with Command Prompt 7) Disable driver signature enforcement 8) Disable early launch anti-malware protection 9) Disable automatic restart after failure 	
Press F10 for more options Press Enter to return to your operating system	

After booting, run the "Firgelli LAC Configuration Utility-1.4-Setup". After it finishes, plug in your powered LAC board

You should now be able to get the Windows Security warning window offering to install the driver.

If you have already plugged in the LAC board before disabling Driver Signature Enforcement, you will have to press Win+X \rightarrow Device manager \rightarrow Other Devices. Right click on "Microchip Custom USB Device", and then left click on "Update Driver Software" and "Browse my computer for Driver Software". Enter "C:\Program Files (x86)\Firgelli LAC Configuration Utility\IA64 (or AMD64) \rightarrow Next

You should get the following window:

Click on "Install this driver software anyway"

Restart computer once again to re-enable the digital sign enforcement.
