By installing the SideArm onto a drone, I agree that I will operate the SideArm equipped drone in compliance with the following:

- Follow community-based safety guidelines for safe drone operation, as developed by organizations such as the Academy of Model Aeronautics (AMA).
- Keep your SideArm equipped drone in eyesight at all times, and use an observer to assist if needed.
- The SideArm can release a payload inadvertently and without warning. Never fly over unprotected persons or moving vehicles, and remain at least 25 feet away from individuals and vulnerable property.
- Do not attempt to lift heavy objects.
- Do not fly in adverse weather conditions such as in high winds or reduced visibility.
- Do not fly or operate the SideArm under the influence of alcohol or drugs.
- Ensure the operating environment is safe and that the operator is competent and proficient in the operation of the drone and the SideArm.
- Always charge the SideArm and the SideArm Controller before flight. Never fly if a red indicator is showing on either the SideArm Controller or SideArm. Flying with a low or discharged battery may result in the SideArm being stalled in the deployed position forcing the drone to be crash landed. GearWurx will not be responsible for damage to the drone or property.
- Never fly over any property that could be damaged by falling objects. The SideArm can release a payload inadvertently and without warning. Purchaser assumes all liability for damages to property and persons while operating a SideArm equipped drone.
- Always operate the SideArm equipped drone in compliance with all laws and ordinances. You are responsible for following all federal, State and local laws which may regulate the use of all products purchased and operated in your area.
- Purchaser is responsible for proper configuration and maintenance of the equipment.
- We are not responsible for any warranty claim due to misuse, crashes, damage, incorrect setup/configuration, or other negligent behaviour.
- It is highly recommended that the purchaser and/or pilot have proper liability insurance coverage at all times in the event that your use of a SideArm equipped drone damages property or hurts a person or other living creature. In general, RC aircraft are not covered under standard liability insurance. Please check with your insurer regarding the correct insurance coverage.

In no event shall GearWurx be liable for special, indirect, incidental or consequential damages related to the use of the sidearm. Indemnity: purchaser shall indemnify and hold harmless GearWurx, its officers, directors, agents, representatives and employees from any and all claims, liabilities, damages, and expenses (including attorneys' fees actually incurred) on account of death or injury to any person or damage to any property arising from or in connection with any goods supplied. This indemnity shall apply without regard to whether the claim, damage, liability or expense is based on breach of contract, breach of warranty, negligence, strict liability, or other.
