

litter·robot® *Open Air*

RAMP INSTALLATION GUIDE

The Ramp fits in front of the Litter-Robot to create a gentle entrance for your cat and catch litter on the way out.

- Non-slip rubber feet
- Reduces litter tracking
- Easy to clean
- Simple to install - no tools required

Ramps can be ordered at www.litter-robot.com.

The Ramp uses your Litter-Robot's existing Step Mat

INSTALLATION

1. On the Step of the Litter-Robot, peel up the black rubber Step Mat to reveal the mount for the Ramp.
2. Set the narrow end of the Ramp on the Step, so it rests in the recess.
3. Place the Step Mat in the recess on the top step of the Ramp.

Note: To access the Waste Drawer, simply lift the Ramp off the Step and set aside.

Visit www.litter-robot.com for installation videos.
