Makeblock Me 4 Buttons

Me 4 Button V1.0 is great for all kinds of projects, can work as function button or direction button to control your robots. There are 4 momentary buttons on the PCB board which have a great “click” to them. They all share an analog output and different analog values reflect different buttons. You can easily connect it to Me BaseBoard V1.0 or Me BaseShield V2.0 by 6 Pin RJ11 cable.

Features

- Four friendly momentary tactile buttons
- A state indicator and a power indicator
- 16mm interval M4 mounting holes, compatible with Makeblock beams
- 2.54mm breakout pins for connecting with jumper wires
- Easy wiring with 6 Pin RJ11 interface

Specifications

- Rated Voltage: 5V
- Size (Length x Width xHeight): 24 x 48 x 16mm
- Weight: 20.00g
