

RB-Sct-553
12V, 2600RPM, 4oz-in Micro Gearmotor

Introducing new line of micro gearmotors. Although these micro gearmotors have a footprint comparable to a micro-size servo and tip the scales at only 0.3oz, they are incredibly powerful. Allmetal gears ensure the motor will hold up in even the harshest applications. These micro gearmotors have a 3mm D-shaft that protrudes from the gearbox case.

Note: Case sold separately
