

## RB-See-353 USB To Uart 5V/3.3V Serial Adapter

USB To Uart 5V/3V3 is a USB to serial adapter, which is based on CH340. CH340 is a USB bus converter chip and it can realize USB to serial interface, USB to IrDA infrared or USB to printer interface. This module is compatible with 5V and 3.3V and it can be used for uploading code or communicating with MCUs.

### Features

- Full speed USB device interface, conforms to USB Specification Version 2.0
- 3.3V and 5V compatible I/Os
- Supports baud rate varies from 2400bps to 115200bps
- Hardware full duplex serial interface, set transceiver buffer
- LED Indicator

### Specifications

- Working voltage: DC 5V
- Working current: <10mA
- Operation system: Windows, Linux, Mac
