

# Robotic Art Studio

by Robohood

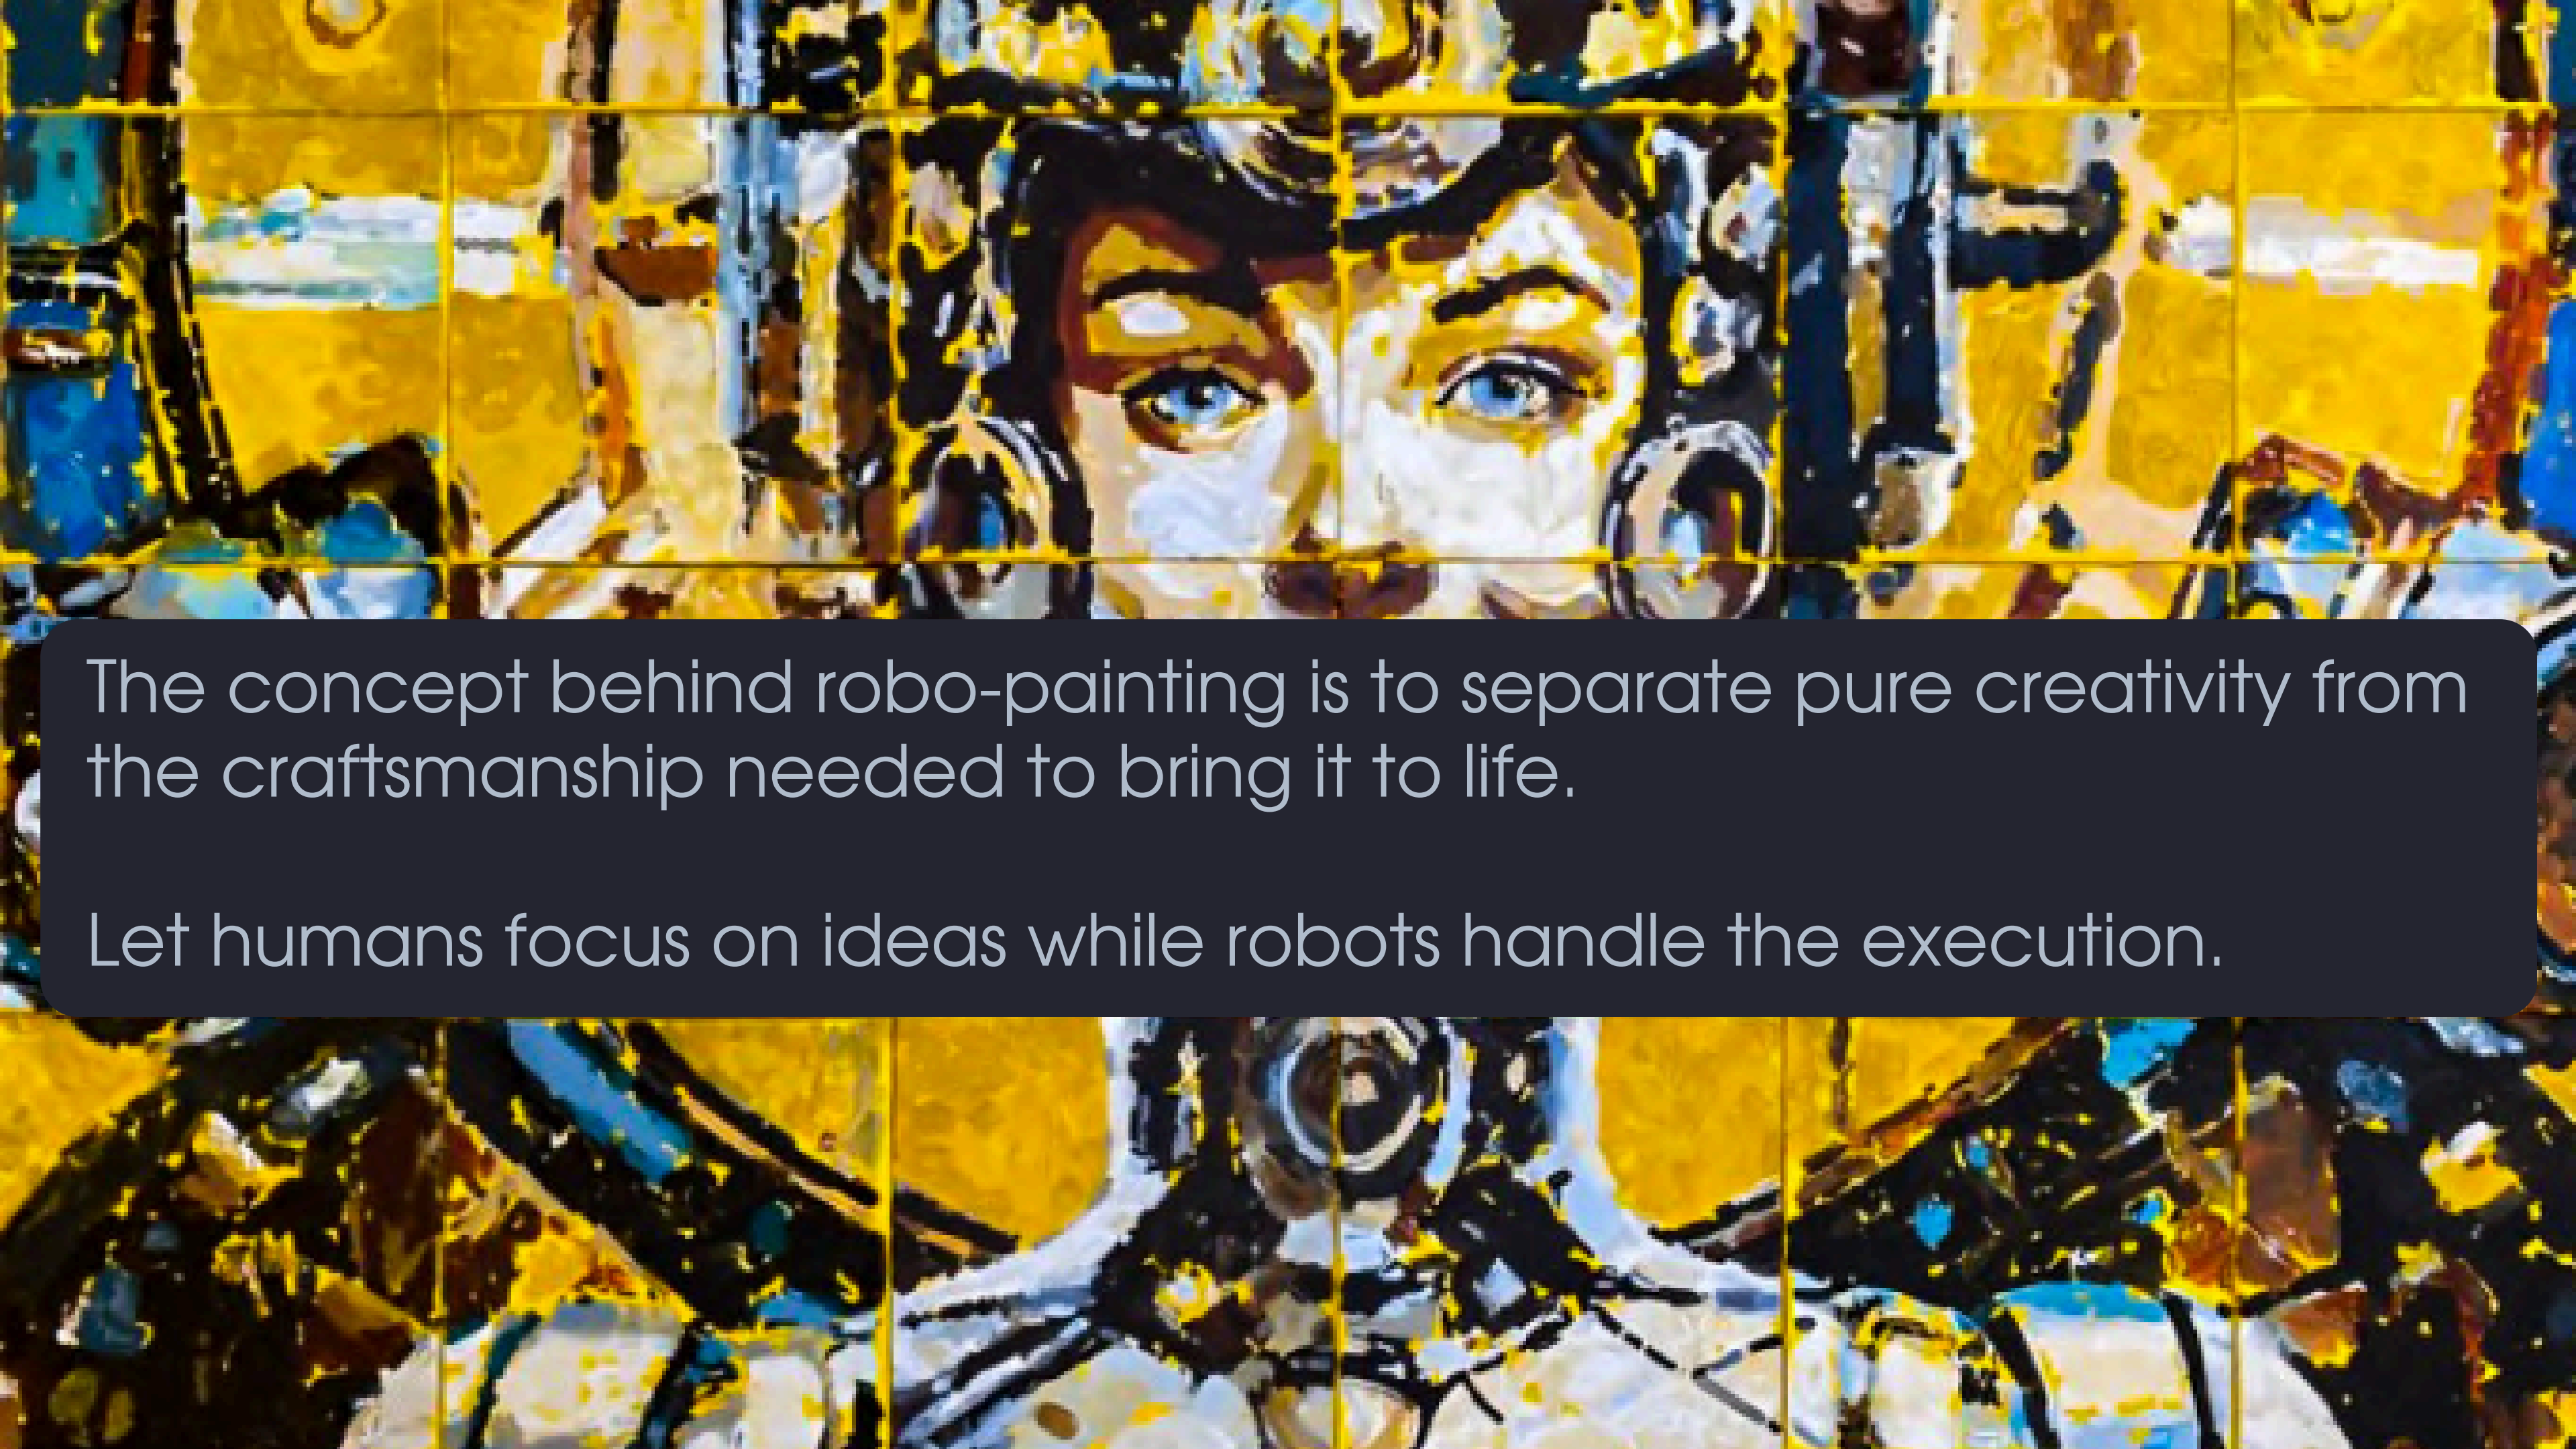

# Robot Artist is a cool way

to paint **any image** on **any surface** from  
canvas to T-shirts

The concept behind robo-painting is to separate pure creativity from the craftsmanship needed to bring it to life.

Let humans focus on ideas while robots handle the execution.

# Product Overview

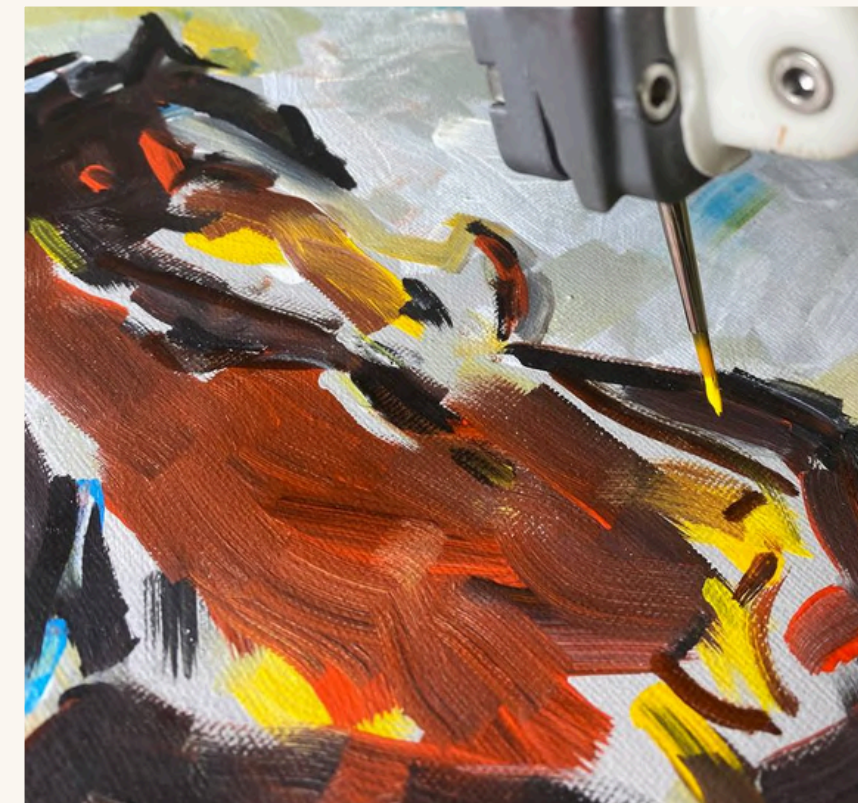

## How it works?

AI-powered technology converts any image into robotic arm movements

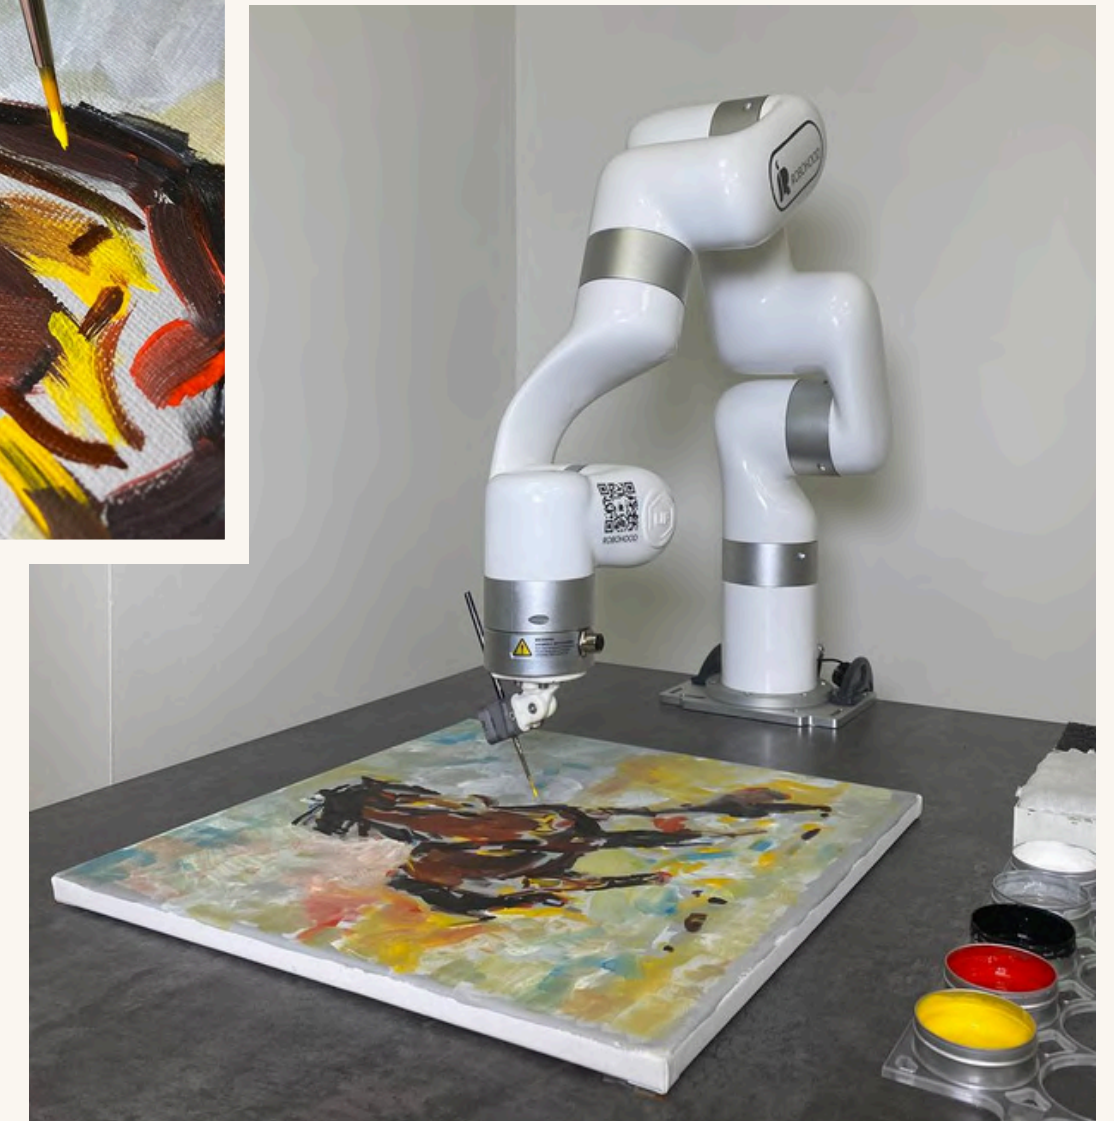

1. Upload or generate an image

2. Configure settings & get preview

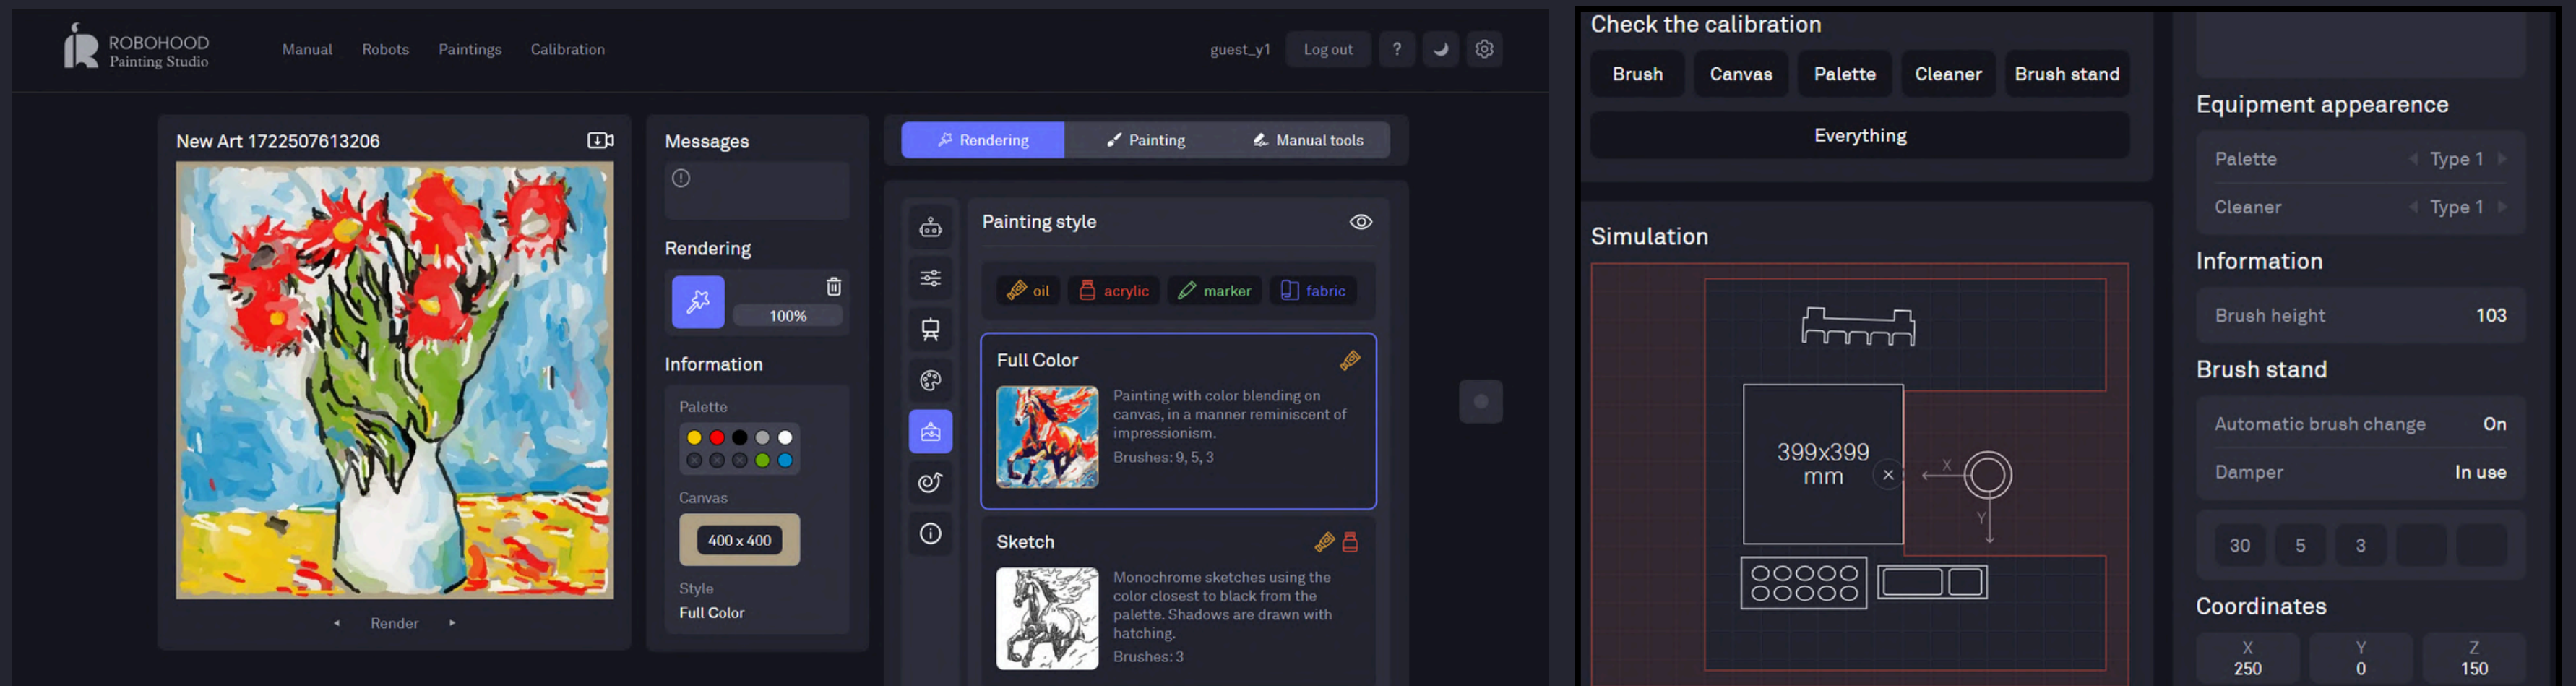

3. Robot paints

# Key features

- Easy robot set up and calibration
- User-friendly web interface
- Remote painting process control
- 7+ painting styles
- Smart palette & color mixing
- The robot changes 5 brush sizes automatically

# What you need to start

All you need to start using the Robotic Art Studio:

- **Robotic Arm (Cobot)\***
- **Laptop**
- **Table** (about 120x80 cm)
- **Internet**
