

Hamster By Cogniteam

Smart, Small R&D Robot

Thank you for showing interest in Hamster ROS robotics development platform. Hamster is a small, smart, indoor robot that can help you achieve your R&D objectives **easily** and **quickly**.

Specifications

- **Motor Encoder** for increased accuracy
- Hamster comes with **PID controller**
- **Small & Lightweight**
- Open development platform with **ROS 1** & **ROS 2 pre-installed** and configured

RealSense depth camera

2D LIDAR (360 degrees)

Ackerman steering

cogniteam

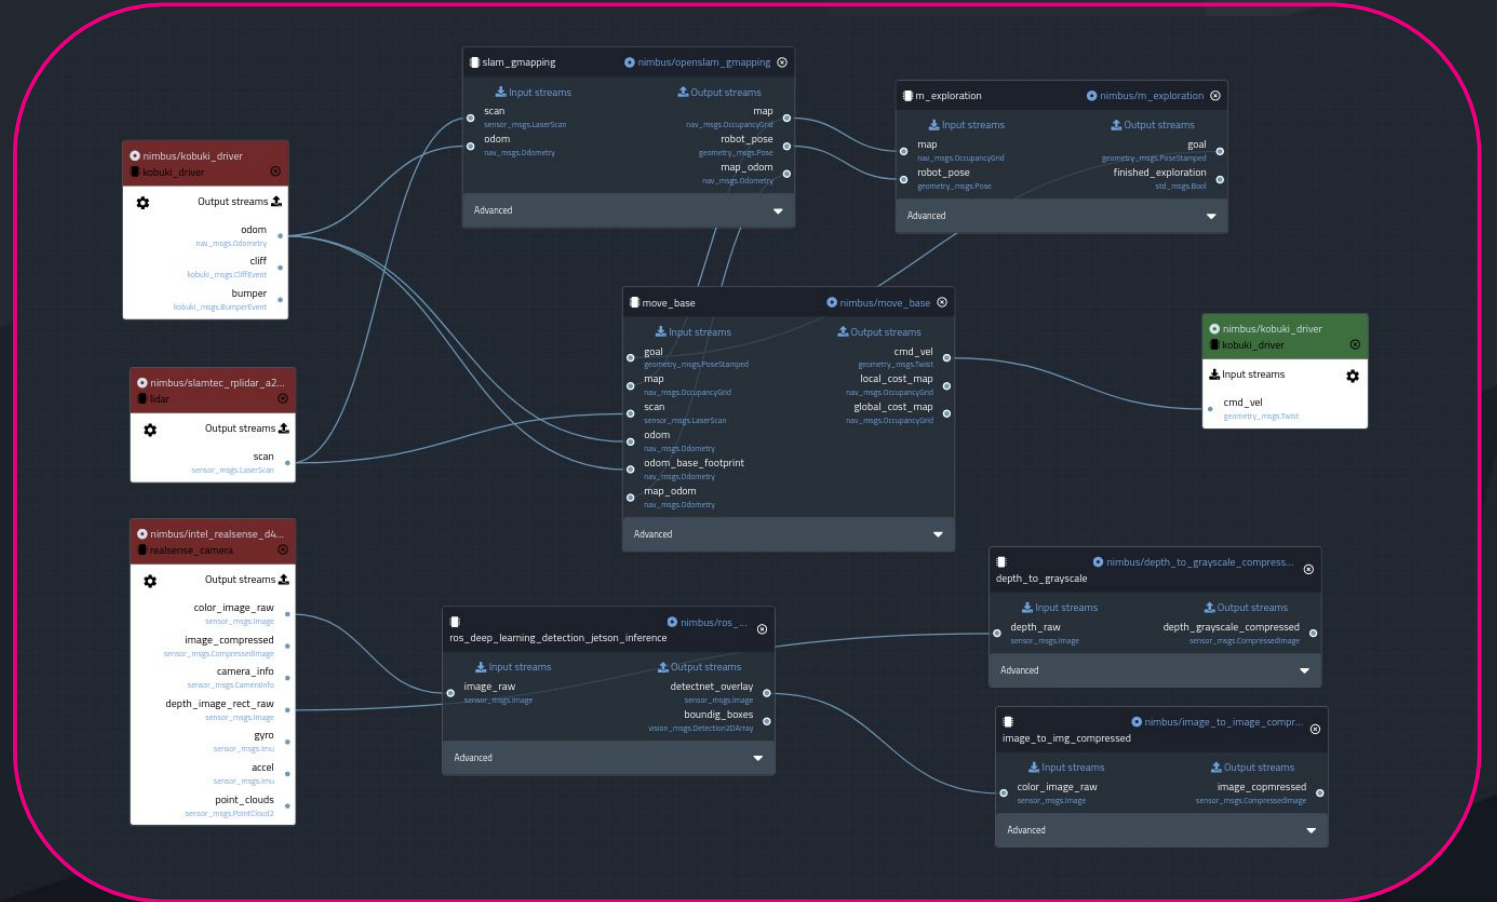

Specs	Hamster V8
Compute	Raspberry PI 4
Depth Camera	RealSense D435i
Motor Encoder	✓
IMU	Streamed from RealSense
Lidar	2D lidar, 360 degree (12m)
Replaceable Battery	✓
Battery Capacity	2200mAh
Dimensions	25L x 20W x 15H
Weight (Kg)	~1.5

nimbus

by  cogniteam

All Hamsters delivered with ROS drivers & Nimbus environment **pre-installed.**

Nimbus (www.cognimbus.com) cloud based platform has been designed to address current robotic development challenges and aims to offer a seamless **drag-and-drop experience** to allow **rapid development** of robots, deployment, robot fleet management and teleoperations. Nimbus is a **one-stop-shop** for managing a robot full life-cycle.

Drag, Drop and deploy ROS components

nimbus

by cogniteam

*A **one-year free** standard license for cloud development on Nimbus is **included**.

(Nimbus does not limit by any means the development on the robot and can be uninstalled at any time leaving the robot fully functional through ROS).

Click here to view **Nimbus tutorials** (www.cognimbus.com/tutorials).

Run your code on a simulated Hamster, on the browser using Nimbus
