

The QCAT Development board

QCAT106 Development Board

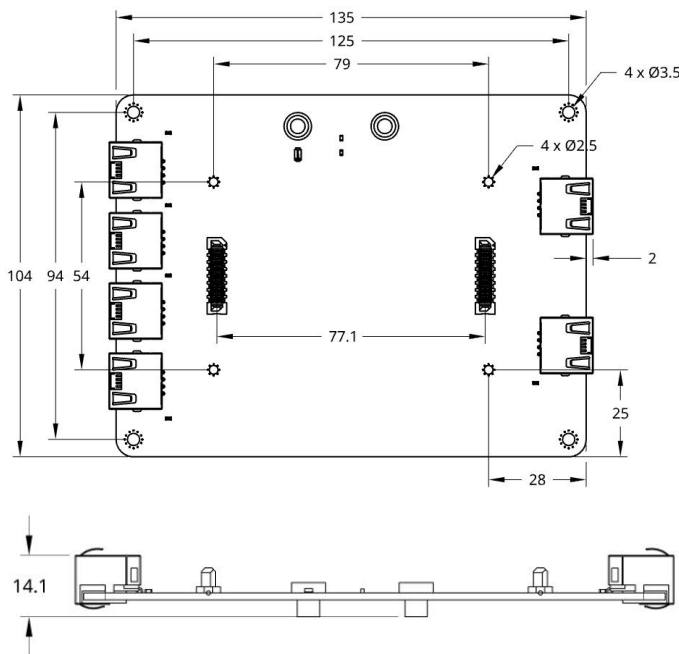

Description:

H4-lab's QCAT106 Development Board is meant to ease and accelerate your development cycle when paired with our QCAT106 ERM8 header EtherCAT® switch.

Equipped with RJ45 connectors, the QCAT106 Development Board exposes 6 EtherCAT® ports in a standardized manner and allows you to easily connect with the various other EtherCAT® devices that you already possess. **Please note the QCAT106 Development board is sold separately.**

Mechanical Drawing:

- Size: 135 x 104 x 14.1 mm
- Weight: 80 g

All dimensions displayed are in millimeters (mm)

Features and benefits:

- To be used with H4-lab's QCAT106
- Speed up development time
- Ubiquitous RJ45 connectors
- EtherCAT® communication
